AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the

application:

LISTING OF CLAIMS:

1-4. (canceled)

5. (currently amended): A disc player connectable [[t]] to a mixing apparatus which

is capable of mixing two audio signals and has an operating part for adjusting a mixing level,

said disc player comprising:

an outputting part which outputs an audio signal read from a disc;

a memory for storing a designated address position; and

a controller which performs a control ~~position~~ operation to start a reproduction operation

when an instruction to start reproduction is received from said mixing apparatus and stop the

reproduction operation and to move a pickup to an address position stored in said memory to

stand by when an instruction to stop reproduction is received from said mixing apparatus.

6. (new): A disc player as claimed in claim 5, wherein said address position stored

in said memory is an address position previously designated by a user.

7. (new): A disc player connectable to a mixing apparatus which is capable of mixing two audio signals and has an operating part for adjusting a mixing level, said disc player comprising:

outputting means for outputting an audio signal read from a disc;

memory means for storing a designated address position; and

control means for performing a control operation of starting a reproduction operation when an instruction to start reproduction is received from said mixing apparatus, and stopping the reproduction operation and moving a pickup to an address position stored in said memory means to assume a waiting state when an instruction to stop reproduction is received from said mixing apparatus.

8. (new): A disc player as claimed in claim 7, wherein said address position stored in said memory means is an address position previously designated by a user.
